### About Wilson Wraight

Wilson Wraight is a leading provider of agricultural, environmental and planning consultancy services. Based in Bury St Edmunds and led by five Partners, our range of high-quality and efficient management services aim to support land-based businesses throughout East Anglia and beyond. We are committed to creating an environment that enables our team to continuously develop, succeed and thrive.

### Job Purpose

The successful candidate will provide specialised advice on a number of environmental areas, including natural asset management, environmental mitigation and advising on grants and schemes.

### Key Areas of Responsibility

Take responsibility for developing a high level of expertise on a range of UK environmental schemes and initiatives, such as Agri-Environment Schemes, Carbon Calculations, Natural Capital and Biodiversity Net Gain

Be the “go-to person” on all environmental matters for our team and clients

Continuously research and evaluate new opportunities, seeking ways to add considerable value and generate new business

Liaise directly with farmers, estates, local authorities, regional planners and land owners amongst others

Maintain and improve upon your knowledge of the sector, keeping colleagues and clients informed

Produce accurate and appropriate documentation and proposals

## Applicant Requirements

The successful applicant will have the following skills:

- An understanding of current and emerging environmental legislation specific to UK agriculture
- Commercial acumen
- An enthusiasm for the environmental sector
- The ability to communicate on technical and commercial levels to a diverse range of clients
- A willingness to take the initiative
- Be an independent learner, who can also contribute as a strong team player
- Willing to work from the office and travel to farm meetings
- Specialist ecology knowledge is not required although may be useful
